

TIBALOK

The hydraulic quick coupling allows for quick tool changes on the excavator. It is a specialized device for connecting and disconnecting excavator hydraulic lines and their associated attachments, such as tilt buckets, sorting grabs, hydraulic compactors, and more.

The TIBALOK system is mounted onto an existing hydraulic quick coupler and make it into a hydraulic quick coupler. An optional 7-pin electrical connector is also available.

TIBALOK can be mounted on various well-known quick couplers, such as CW 20 to CW 55, as well as HS10 and HS21/25. Also available on Pin grabber (PINLOCK, S Lock etc.)

Installation on wheel loaders between 5 and 30 tons is also possible upon request.

TIBALOK

Technical Data

Line Connection	2 x 1 inch
Oil Flow	160 – 240 l/min
Line Connection	3 x 1/2 inch
Oil Flow	40 – 60 l/min

In Short that means:

Our specialized device for connecting and disconnecting hydraulic lines on excavators and wheel loaders.

- Tool change in under 10 seconds
- Cost savings compared to system replacement
- Quick coupler system as a retrofit kit
- Control directly from the operator's cabin
- Suitable for wheel loaders from 5 t / excavators from 10 t class
