

Cablemaster

The Kabelmaster is a practical attachment that facilitates the laying of cables and pipes. With a KM 3000 attached to an excavator, cable and pipe drums weighing up to 5 tons can be moved and unrolled by just one employee.

The smaller KMR 2000 version with a maximum load capacity of 3 tons can be attached to both excavators and wheel loaders. This makes handling drums of various sizes particularly safe and easy. A rotary drive is available as an option at an additional cost.

A blue metal frame (Kabelmaster) is shown holding a large wooden cable drum. A red hydraulic excavator arm is attached to the top of the frame. The background is a blue sky with a pinkish-purple particle effect. The text 'Rent or Buy' is inside a pink circle, and 'KABEL MASTER' is written in large white letters at the bottom.

KM 3000

- Dead weight = 865 kg
- Roll diameter $\varnothing$ max. 2.55 m
- Drum width max. 1.65 m
- Maximum load = 5 t
- Rod diameter
 $\varnothing$ 77 mm and $\varnothing$ 89 mm

Key Facts

- Can be used with excavators weighing 6 tons or more and wheel loaders
- Makes it easier to lay cables and pipes
- Safe and easy handling of cable drums
- The Cablemaster can be operated by a single machine operator – low personnel requirements

KMR 2000

- Dead weight = 320 kg
- Roll diameter $\varnothing$ max. 2.4 m
- Drum width max. 1.8 m
- Maximum load = 3 t
- Rod diameter
 $\varnothing$ 77 mm and $\varnothing$ 89 mm
